Commissioner for Patents  
United States Patent and Trademark Office  
P.O. Box 1450  
Alexandria, VA 22313-1450  
www.uspto.gov

Date : June 15, 2006

Appl. No. : 09/637,844

Patent No. : 6,858,423

Inventor(s) : Abbott et al.

Issued : Feb. 22, 2005

For : OPTICAL AMPLIFICATION OF MOLECULAR INTERACTIONS USING LIQUID CRYSTALS

Re: Request for Certificate of Correction

Consideration has been given your request for the issuance of a certificate of correction for the above-identified patent under the provisions of Rule 1.322.

Respecting the alleged error(s) in Col. 1, line 11, after inspection of the application, it is revealed that the lines are printed in accordance with the record. After referring this to an office Team leader and then the Supervisor, the Supervisor stated, "The cited text does not carry over, but should've been filed in this application. How can we approve this without knowing they sent it in before - as there is no proof"? Therefore, being no fault of the Patent and Trademark Office, no correction(s) is/are in order here under United States Codes (U.S.C.) 254 or 255 and the Code of Federal Regulation (C.F.R.) 1.322 or 1.323).

In view of the foregoing, your request in this matter is hereby denied.

For further consideration, submit a Reconsideration Request for Certificate of Correction - along with supportive documentation.

*Note: This is a general hint, which may decrease the processing time of your request:*

Certificate of Corrections are issued to correct errors of minor nature, i.e. typographical, spelling or grammar errors, errors not considered "critical information"; which are correctable under the provisions of 1.322a; or applicant's errors correctable under the provisions of 1.323. If you obtain data that clearly shows the attorney/applicant is not in error, simply include supportive documentation and associated post card receipts, along with your certificate of correction or reconsideration via postal mail, not by fax. If you do not have supportive documentation that clearly shows the attorney/applicant is not in error and verifies that the PTO is in error regarding the matter in your request - then, the appropriate fee of \$100.00 with your "Certificate of Correction" or "Reconsideration Certificate of Correction" - will be necessary. Without supportive documentation, depending upon the matter in your request, it is possible - that in addition, a petition with its appropriate fee of \$130.00 may be necessary, or the request may be denied. Please be advised that - "identification of the exact point of error, by reference to column and line number in the printed patent", provides needed clarity to process a request; if a certificate of correction (PTOL-1050 form) is not clear and concise, its processing could possibly be in error, delayed, or denied. Please see the MPEP for further instruction and understanding.
